**OPERATING AND MAINTENANCE INSTRUCTIONS**

**FL7A Operation - FL76-D400-FIB2-L-HEX-OP**

**COVER REMOVAL**

**WARNING**

The handle must be used at all times to remove/replace the cover. Do not insert any levering device between the cover and frame.

Periodically remove debris from the cover key-housing. Fill with grease or anti-freeze in cold climates during winter.

**1**

Use the lock key and rotate anti-clockwise to unlock the 2 No. locks.

**2**

Insert handle, turn clockwise.

**3**

Release foot pedal.

**4a**

Push down on foot pedal.

**4b**

If cover will not lift, stand on lever, stamp on pedal.

**5**

Return lever to upright position.

**6**

Remove cover.

**PLEASE HAND TO SITE OPERATOR**

The handle must be used at all times to remove/replace the cover. Do not insert any levering device between the cover and frame.

Periodically remove debris from the cover key-housing. Fill with grease or anti-freeze in cold climates during winter.
COVER REPLACEMENT

7. Clean the frame gasket/seal and cover as required.

8. Align correctly with frame. Push cover into position using your foot.

9. Stamp cover down.

10. Use the lock key and rotate clockwise to lock the 2 No. locks.
