VERY IMPORTANT

To allow for drainage, Fibrelite recommends that the concrete be sloped away from the top outer edge of the frame (A) a minimum of $1/2$" over a 12" distance. Do not expose the top outer edge of the frame (A) – the concrete pad must be flush with the top outer edge of the frame.
CONCRETE

VERY IMPORTANT

FRAMES MUST BE INSTALLED FLUSH WITH FINISHED GRADE OR SET SLIGHTLY BELOW FINISHED GRADE TO PROTECT FROM SNOWPLOW DAMAGE

VERY IMPORTANT
The underside of the frame must be adequately supported by concrete.

"A"

5 - 10mm

300mm

500mm

Minimum 200mm
Maximum 350mm

Joint tied with 24" long x 12mm dowel at 24" c/c. Half bonded.

Concrete reinforced with 2 layers of reinforcement mesh.

PEA GRAVEL   CONCRETE
