## CONCRETE

### VERY IMPORTANT

FRAMES MUST BE INSTALLED FLUSH WITH FINISHED GRADE OR SET SLIGHTLY BELOW FINISHED GRADE TO PROTECT FROM SNOWPLOW DAMAGE

**VERY IMPORTANT**

To allow for drainage, Fibrelite recommends that the concrete be sloped away from the top outer edge of the frame (A) a minimum of 1/2" over a 12" distance. Do not expose the top outer edge of the frame (A) – the concrete pad must be flush with the top outer edge of the frame.

## TARMACADAM

36"square vented, flat composite cover with an aluminum frame. Temperature & chemical resistant. Designed for steam applications.
